Conference is April 10-13 in Atlanta

No matter how sophisticated the technology, it still takes people!™

Mile High Chapter of the AITP, a
nonprofit association dedicated to
serving the upwardly mobile IT
Professional.

Join us on February 20th for ROI on Green Technology

Join Mark Nixon (FORTRUST Data Centers) and Jeremy Stephen (SeeGee Technologies) in a discussion on the business of green IT and the “Green” effect of technology changes on a company’s bottom line.

Green technology initiatives have been around since the early 90’s and have spread from government to commercial to residential. The Green IT movement is picking up speed with the advancement of green data center technologies. Mark and Jeremy will focus on Green technologies which directly impact the bottom line of business owners and data center operators through the introduction of the following topics:

- The green IT movement
- Green technology trends (The greening of IT)
- The business impact of green technologies
- In-house server room technologies
- Multi-Tenant Data Center technologies
- Data center sustainability initiatives
- The Future Proof Data Center

Mark Nixon’s professional IT experience spans nearly three decades in many technology disciplines within IT and as a service provider. Mark has held positions in help desk support, systems administrator, Internet programming, project manager and IT architect with companies such as Hewlett Packard, Rhythms NetConnections and JD Edwards.

In the Service Provider arena, Mark has supported customer IT teams, engaged with IT partners and directed sales engineering and service provisioning activities with Qwest and FORTRUST Data Centers. Recently Mark has moved into a business technology role, Business Solutions Advisor at FORTRUST, working with customers and technology partners to execute business driven IT strategies. Mark can be reached at mnixon@FTDC.com

Jeremy Stephen has been in virtually every facet of technology for the past 15 years. Starting out with a startup ISP located in Steamboat Springs, which was sold to FRII several year later. Then started a service company managing networks, hardware, software, security, end user support, and training. After selling business he worked for two years on a database contract for State Farm claim offices nationally. Once returning to Steamboat Jeremy completed the design and construction of an energy efficient home in Steamboat Springs. Currently, Jeremy is the head of business development for the Rocky Mountain Region for SeeGee Technologies and has been providing efficient and cost saving IT services and consulting with a long term IT solutions focus for small business on up to fortune 500 companies.

Jeremy can be reached at jstephen@seegee.com
